EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

This application is in condition for allowance except for the presence of claims 1-16, 24, 25, 30-33, 37 and 38-51 directed to species non-elected without traverse. Accordingly, **claims 1-16, 24, 25, 30-33, 37 and 38-51 have been cancelled.**

Drawings

2. New corrected drawings in compliance with 37 CFR 1.84(l) are required in this application because the drawing contains lines, numbers & letters that are not uniformly thick and well defined (poor line quality). Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

The following is an examiner's statement of reasons for allowance:

As previously stated in the Office action mailed on 1/18/07, the prior art of record fails to teach and/or render obvious a wound therapy device comprising, inter alia, a fluid impermeable housing comprising a cavity and a chamber; a porous sponge associated with the cavity; and an osmotic cell having an osmotic membrane positioned between the cavity and the chamber, for removing the fluid from the sponge, and transporting said fluid into the chamber.

The limitation of "an osmotic cell having an osmotic membrane" is being interpreted as including a saturated salt solution or salt pellet in the chamber in order to promote osmosis since "osmosis" is defined as a movement of a solvent through a semipermeable membrane into a solution of higher solute concentration (the salt solution) that tends to equalize the concentrations of solute on the two sides of the membrane. That is, the osmotic cell requires the salt solution in the chamber to promote the movement of the wound exudates/fluid from the sponge into the chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Darwin P. Erez whose telephone number is (571) 272-4695. The examiner can normally be reached on M-F (8:00-4:30).
